

Stratco Oreyray

Metal Mining Core Trays

PAT. PEND.

Quality Metal Core Trays

Manufactured from high quality Zinc/Al, Stratco Metal Core Trays are designed for a long useable life. Stratco Oreyrays come in BQ2, NQ2, HQ & PQ sizes.

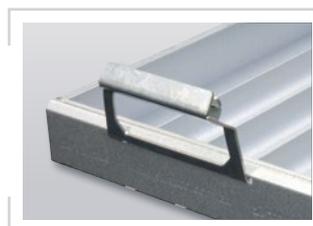

Superior Design

- Strong, high-tech rivets are stronger than conventional aluminium.
- Safety edges to prevent cut injuries.
- Drainage slots to allow for external drainage to prevent cross-contamination of core samples.
- Strong and functional chamfered ends:
 - Easy lifting point when stacked together, reduces pinch point area.
 - Allows end slots to drain fluids away when stacked, not into the tray underneath.
- All trays can hold 1 full metre of core per flute.
- Strong detachable handles for safe & easy handling.
- Can be purchased assembled or unassembled.
- Optional lugs allow safe and easy stacking for storage and transportation.
- Custom sized trays available upon request*.

*Minimum order quantities may apply.
