

Stratco Ezi-Stack

Metal Mining Core Trays

PAT. PEND.

Quality Metal Core Trays

Manufactured from high quality Zinc/Al, Stratco Metal Core Trays are designed for a long useable life. Stratco Metal Core Trays come in NQ, HQ and PQ sizes.

Superior Design

- Strong, high-tech rivets are stronger than conventional aluminium.
- Secure nesting ends which allow 'ezi' movement of stacked trays.
- Drainage slots to allow for external drainage to prevent cross-contamination of core samples.
- Ideal for transportation in remote areas.
- All trays can hold 1 full metre of core per flute.
- Strong detachable handles for safe and 'ezi' handling.
- All trays can be purchased assembled or unassembled.
- Unassembled trays are pre-punched - no drilling required for safe and 'ezi' assembly.
- Custom sized trays are available upon request*.

*Minimum order quantities may apply.
